ABOUT ME

I have 2 years experience full-stack developer. Last year I worked on a commercial project in the node.js stack, telegraphm. api, nest.js, express, mongoose, webSocket, apollo, react, serviceWorker, graphql, moment.js, rabbitmq, git, gitlab, ci/cd, google.api (development of an online store application with delivery by drivers in conjunction with a bot telegraphm and nest.js backend). The project ends in March, so I'm looking for a new team.
